Hourly/daily rates (in NOK) without operator cost

	User Category 1	User Category 2
Routine instrument	350 per sample	600 per sample
Powder diffraction	500 per hour 6000 per day	800 per hour 9600 per day
Thin film studies	500 per hour 6000 per day	800 per hour 9600 per day
SAXS	500 per hour 6000 per day	800 per hour 9600 per day

	User Category 1	User Category 2
Single Crystal studies*	3000 per data set*	Upon request
*Master students are partially supported by the Department of Chemistry and will be charged 250 NOK per data set. PhDs that are KD funded will be partially subsidized by the Department of Chemistry and will be charged 2000 NOK per data set.		

User category 1: Users from the University sector (including PhD/Post docs from the Institute sector)

NOTE: Access for Master students is free, except for the use of the Single Crystal instrument, see below. PhD students funded by KD are charged as category 1, however, written requests for a lower rate owing to poor funding of running costs will be considered favorably)

User category 2: Industry (including industrial assignments via the Institute sector)

Operator cost and consumables

Operator costs will be charged at a rate of 500 NOK/hour for user category 1. Costs for category 2 are provided upon request. These costs apply when an RECX operator is required for performing or assisting during the experiments.

The user will bear the costs for gases or other consumables used during in situ experiments.

Training

Basic training in the routine instrument is free for all, for the other instruments there is a fee applicable. For each instrument the training fee will be (in NOK):

	Master students	Internal users	External users
Price per training for one type of instrument	2000	5000	7500

All prices are in Norwegian Kroners.

The prices apply for 2015 only.
